SUBJECT: Agency Share of [] (Case E-97) Aircraft Modification

1. I continue to be concerned about finding out after the fact that the Agency is on the hook for a considerable sum of money in the subject aircraft modification program. While I understand that the bulk of the cost, now estimated at [] must be borne by the Air Force, the Agency portion is not fixed (is also not known) and we could be in for a disagreeable surprise.

2. I want to be sure that we have made no commitments in this area until we have an estimate which is understood and agreed upon by AD/OEL.
